

Premiere's enhanced Tong Truck is another commitment to our Team Members and Customers while enhancing our capabilities for land operations. It is critical that efficiency and safe operations allows our Team Members to performed superior reliability to reduce any flatline time during the casing running process. The Premiere Tong Truck does just that!

The Premiere Tong Truck

Our Tong Truck has been design with safety, efficiency, and noise in mind. Safety on location while maneuvering typical equipment is critical and can be costly to the Client due to mishaps with handling of that equipment. Our Tong Truck does it all without the use of a forklift.

Premiere's Tong Truck's enhanced system decreases our fuel consumption by over 50% while tremendously reducing the noise on location with a smaller engine. Easy Setup times reduce the risk of handling and a decreased hydraulic hose size means less possible injury.
